

CytoBrite® PLUS Slide Incubation System

Only FISH Hybridizer Fully Compliant with New CAP Regulation CYG.33950

Designed to meet the requirements of new CAP regulation CYG.33950, the CytoBrite® PLUS Slide Incubation System is equipped with a separate temperature sensor for each of its 12 slide positions. Simply connect the provided NIST-certified digital thermometer to view each slide position temperature.

CYG.33950

ISH Slide Processing System Temperature Checks

Phase II

Individual slide slots (or a representative sample thereof) of *in situ* hybridization (ISH) temperature controlled slide processing systems are checked for temperature accuracy before being placed in service and at least annually thereafter.

Evidence of compliance:

- √ Written procedure for verification of temperature accuracy **AND**
- √ Records of equipment verification
